SECTION C-C

SECTION E-E

SECTION B-B

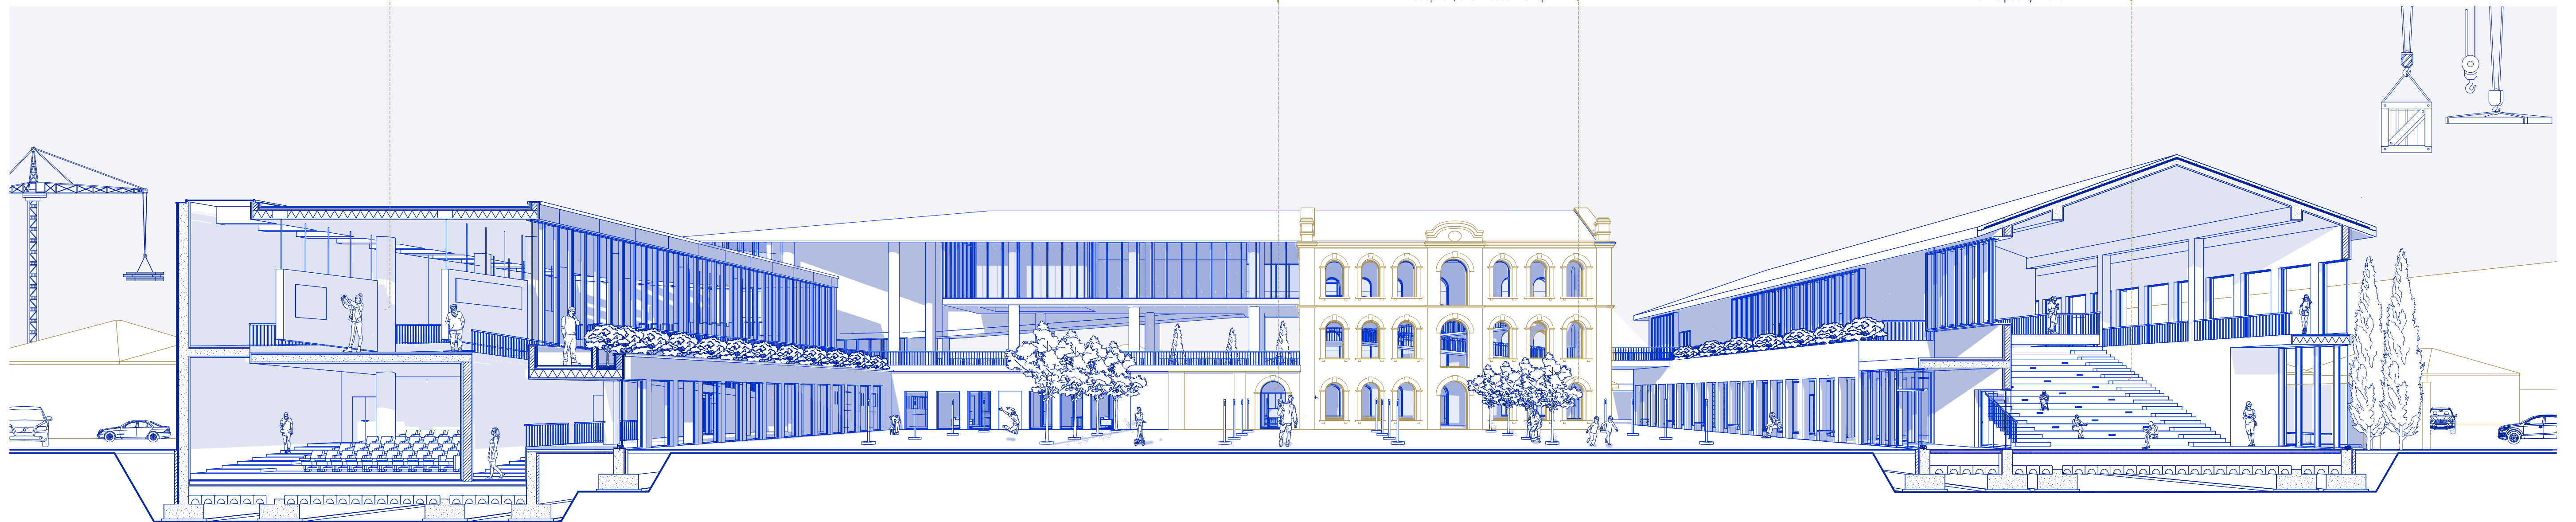

The ramp gallery's placement and transparency encourage visual connectivity and fluidity, fostering an interactive and dynamic environment that enriches visitor engagement with displayed artworks.

In the design of the complex, every axis and guiding line is intended to direct the viewer's attention toward framed views of nature and the landscape.

Visitors enter the main building via a suspended ramp, experience the temporary gallery displays, and continue toward the culinary art school. A glass balcony overlooks almond gardens, while the ground floor houses the waiting hall, reception, and museum shop.

The entrance hall is a multi-use space for moving upstairs, socializing, and resting. It can also host conferences. Below it is the dining hall, while the two upper corridors link the museum to the school and lead students to the pastry kitchen.
