Tesi di Laurea Magistrale

THE RULE'S SHAPE.

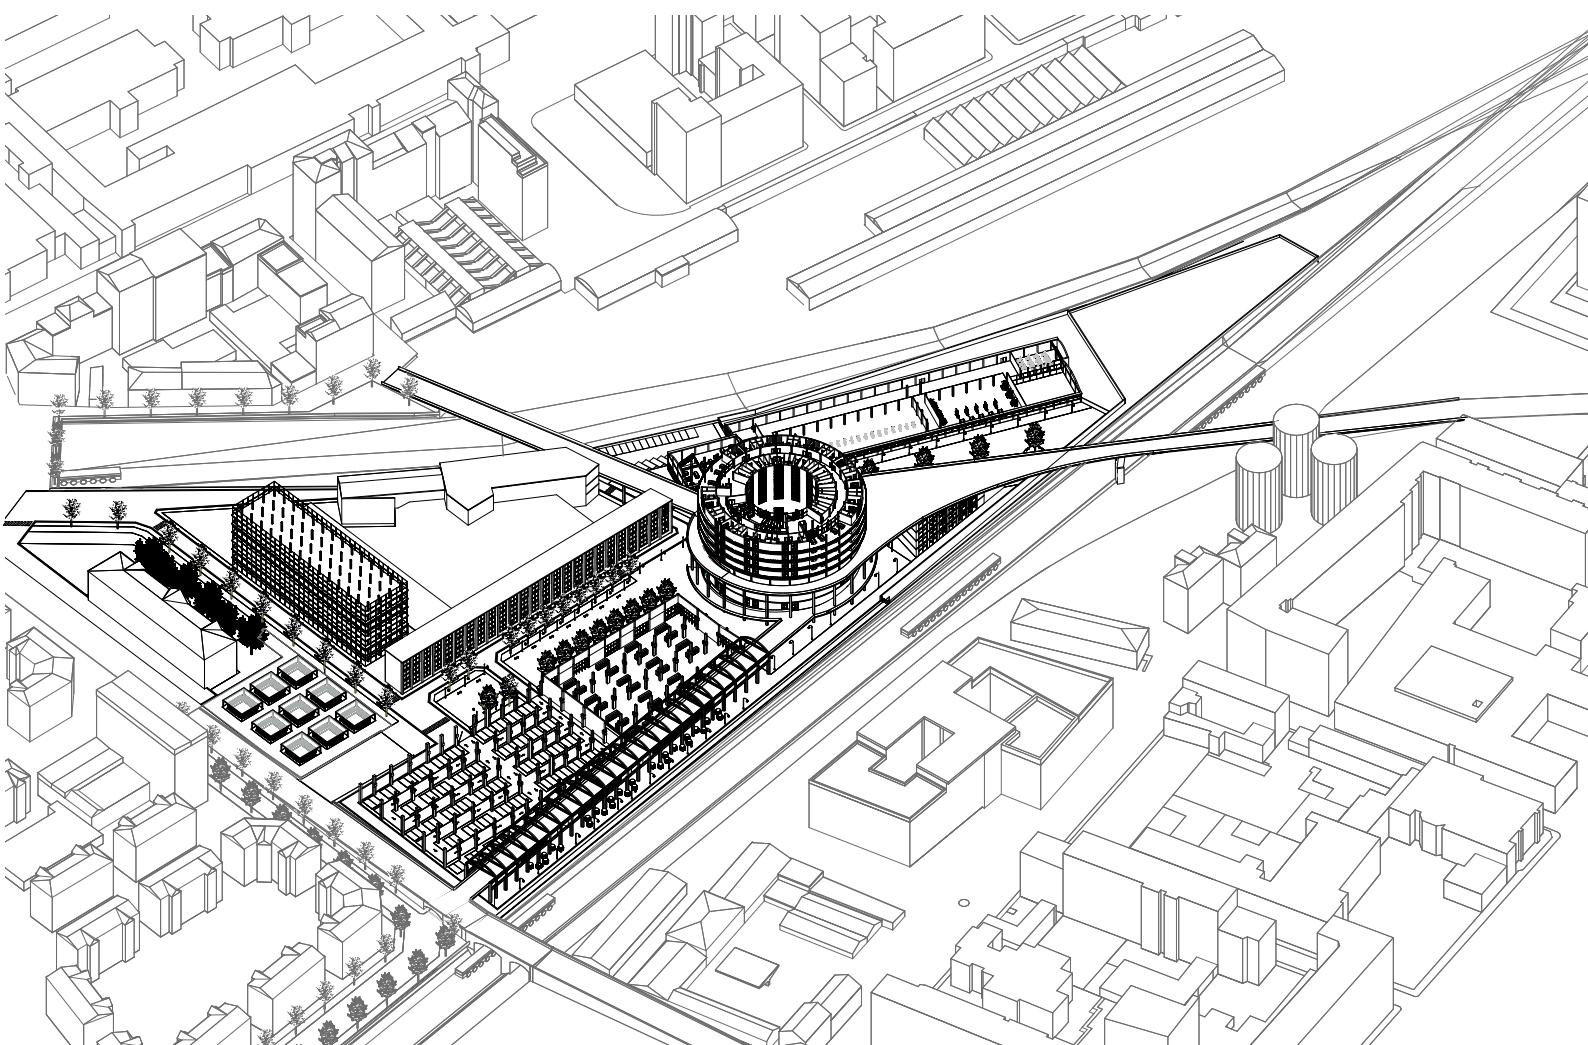

The PRG of Turin city and the project of the Osi-Ghia area.

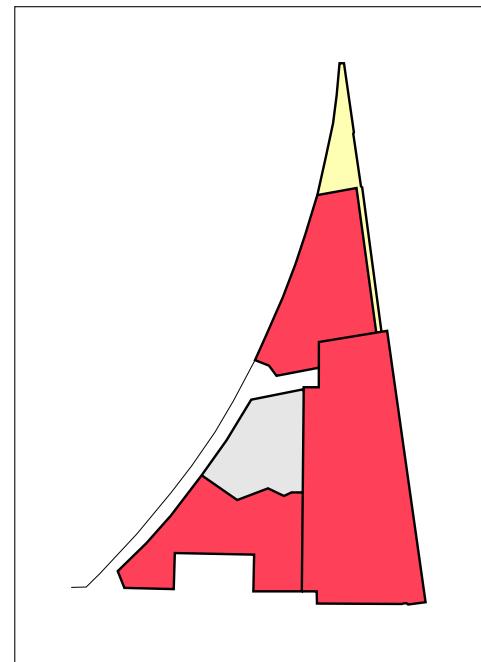

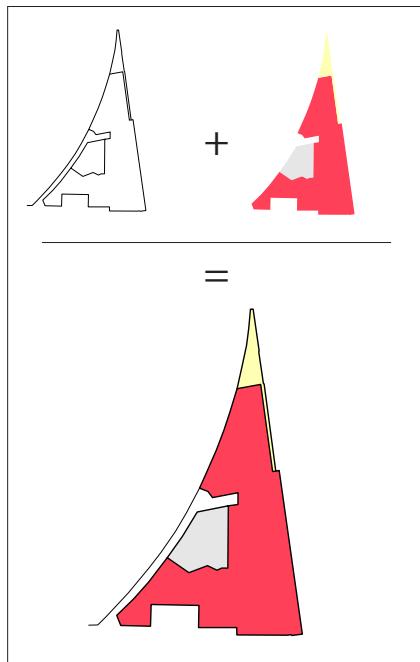

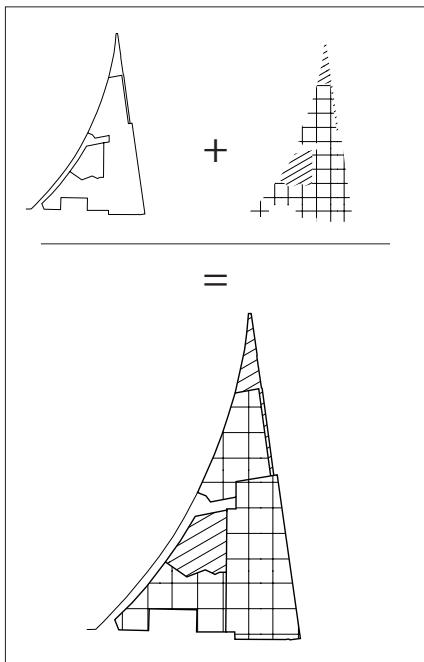

Relatore: Prof. Giovanni Durbiano
Correlatore: Arch. Emanuela Canevaro,
Arch. Rosa Gilardi

Candidato: Micaela Bertola S275406,
Sofia Cameran S275408

The thesis attempts to translate the new urban planning tools of the revised Plan into form, taking the former Osi Ghia industrial urban area into analysis.

The objective is to define a design promise capable of exploiting some of the potential contained in the new NTA (implementation of the permitted building destinations, activation of Temporary Use projects without changing the intended use of the building, introduction of new, more flexible implementation methods, etc.).
