

DEFAULT OPEN DESIGN PROCESS_HOW TO FILL

High Concept
(Meta-Design)

(Concept / New Concept)

The activity consists on tracing the process, in a consequential flow, that took you from a brief and an initial High Concept (Meta-Design) to a Concept Design (Advance Design) that you developed based on relationships and connections. Remember that **FAILURES** are part of the process, and should be tracked.

Don't focus on the details, they can be consulted in other documentation.

On the following pages you will find an example from last year, which can also be found in the Open_Guidelines for Participation.

Terms in parenthesis refer to the terminology of “Man at the centre of the project”

Concept Design
(Advance Design)
