| Sito Davide | s305524 |

Here the causality between the components are clear: if a flow begins from a random point **everything is connected**, hence every node is fundamental to maintain the resiliency of the new system.

```
inside:
what building
has straight
influence on
```

outside:
stakeholder,
partners,
suppliers etc..

| | |
|--------|-----------------|
| ● — .. | Start of a flow |
| .. —→ | End of a flow |

| | | | | |
|--|--|--|--|-----------------------------------|
| | | | | What Gruppo Building already does |
|--|--|--|--|-----------------------------------|

| | | | |
|--|--|--|------------------|
| | | | New intervention |
|--|--|--|------------------|

| | |
|---|--|
|  | Improvement of what Gruppo Building already does |
|---|--|

- Intervention to improve the quality of the resources
- Intervention to improve the construction process or the management of the house
- Intervention that have straight impact on the habits of the people
- Intervention that have straight impact on the house system elements

HOUSE SYSTEM
