

Honors thesis

MASTER OF SCIENCE IN ARCHITECTURE CONSTRUCTION CITY

The Restoration of the ex "American Cine": starting from the preliminary research to the restoration project. The thesis will propose conservation, refunctionalization and enhancement actions for a historic building in the center of Santiago de Chile. The critical approach (preliminary investigations, analysis of the conservation status and design choices) will highlight the methodological differences between a restoration project in the trans-Andean country with respect to the Italian and European criteria, methods and experiences.

**RESTORING THE EXISTING CONNECTING THE IMAGINIFICATION
(FREEDOM) AND THE SUSTAINABLE (RIGOR): valorisation of the Ex
American Cine in Santiago de Chile**
